City of York Specialist Integrated Sexual Health Service

Following a recent procurement, YTHFT now provides sexual health services within the City of York. While YTHFT was the incumbent provider, service users will see transformational changes in the service including:

- the development and delivery of a Single Point of Access (SPoA)
- a sexual health system that uses community assets
- a core digital offer to manage service users needs without the need to see a practitioner
- a 'hub' and 'spoke' model of delivery, a range of appointment options, and 'satellite' clinics.

[This document](#) outlines the changes and the contraception offer for women 20>years of age.
